Subject: Controls needed to ensure cashflows are received by Infinity

Shona, Brent and Sally,
This morning, the cash flows from approximately 75 books were not received by Infinity from the ERMS system. We normally get 375 books and only got 296 this morning.

Per conversation with Joyce Kuo and Mike Moscoso, Susan Trevino, Risk Controls, and Christian, RAC, changed the book heirarchy on Friday, moving global products books, including the prepays, out of the ECT group and into another group. We have had discussions in the past verifying with Risk Controls that the ECT group is the only group which automatically sends its cash flows to Infinity. Other cash flows from books are included only by being listed in a script. This was not done when the books were moved from the ECT Group on Friday.

Obviously, the Rate & Currency is not able to hedge Enron's cash flows when so much has been omitted. At this time we are about one hour away from a good Hedging report for the trading desk. This report is due the desk daily by 7:30 am.

Mike and I discussed the need for controls and sign-off by him or Shona for changes in book heirarchy.
Sheila
