Subject: People to consider recruiting

I asked my new hire to suggest names of people that she knows that would be good for to consider hiring. Here is her response. Tony Vasut had called her and asked for this list as well. Do you have him keyed in on our blitz effort for hiring of risk personnel? Or is he working on some other initiative? I have not reviewed the names nor Shona's comments in detail yet, but I wanted to pass these along for inclusion in our efforts. --Sally

Subject: People to consider recruiting

As requested, I've created a list of people who:
have mentioned to me that they are interested in changing careers/companies or I think would be a great asset to Enron.

I've jotted down what I know about each person and I hope you find it useful. I've organized it from most experienced to least experienced. If you would like to talk me about any of these people or ask me to contact them, just let me know.

Andy Dunn - until 2 weeks ago he was a director in the PwC risk management practice. Due to a falling out between Andy and the partners (not client related), he left the firm. He is extremely well respected by both the audit and the non-audit personnel, and his leaving came as an unexpected surprise. I have worked with him on a number of occasions and would highly recommend him to Enron. The downside to Andy is that he lives in Denver, is used to travelling a lot, but, at the last time we spoke (a few months ago), is not interested in leaving Denver. His cell phone (if still in use) is 303 807 0040.

Mark (Allan) Smith - Mark is in the PwC energy risk management practice in

Houston. We worked very closely together throughout 1999 on projects for Coral Energy and Equiva trading. Prior to working at PwC, Mark was at BP for 15 years where he had many different roles (he worked as a crude trader, products trader, he worked in the risk management department, in the refinery itself as an engineer). Mark was excellent to work with. Clients are extremely impressed with his knowledge and background. I would highly recommend him for a leadership role at Enron. I spoke to him yesterday and he is interested in talking with you. His direct number is 713 356 4233. His cell phone number is 713 412 3890.

Alan Beaton - senior manager KPMG's systems control group (IRM). He works with my husband. I know him on a personal basis. He is trying to find opportunities outside of the audit/consulting area (general line 713 319 2000).

Marilyn Chee - She currently works for Equiva trading, manager in-charge of accounting for derivatives. Her role has expanded to encompass FAS 133 and all mtm accounting entries. She liases with all book heads (crude and all products). In the past, she worked in the Texaco internal audit department. She was my main contact at Equiva when I was at PwC. She is extremely diligent and very professional. I enjoyed working with her greatly and have to say she was one of the best people I have worked with in the capacity of a client/professional relationship. Marilyn has a lot of responsibilities at the alliance and is extremely well respected. She has had a difficult year as she is doing a job that should be done by 3+ people. She has mentioned to me that she is not happy about the fact that her load continues to increase, and has even mentioned finding another job. However, due to the fact that she is so well respected where she is, she may be difficult to recruit (713 277 6280). If you contact her I would not want my name associated with it due to the PwC/alliance relationship.

Rebecca Crider - She has been working at Coral Energy for approximately a year, reporting to the VP of risk control. Before that she was an audit manager at AA. I have worked with her briefly and she seemed very conscientious. I do not know if she is looking or not, but its worth a try! (713 230 3000 general line).

Kim Nelson - She is a manager in the risk group at AA, and just transferred over from KPMG. I have not met her, but I did hear that she is not doing what she had expected at AA. I don't know her number but you could reach her at the general AA line.

Kevin Schroder - audit manager at KPMG in the energy department. I do not know him, but do know he is looking for opportunities outside the audit/consulting area (general line 713 319 2000).

Keith Considine - He is currently a senior accountant at PwC. He is the best senior PwC Houston has, as well as probably one of the best people I have ever worked with (the top of his class). Although he only has 4 years of work experience (all at PwC), he performs in a manager capacity. He worked for me on the Coral Energy audit engagement and received an excellent evaluation from both myself and the partners (we all agreed that he is one of the best people any of us have seen or worked with). He is currently working on a project at one of PwC's clients to standardize their mid office processes . He definitely does not see himself as a long time employee of PwC, but is currently planning on staying there until he is promoted to manager. I actually recommended him for a promotion to manager at July 1 this year, but due to capacity issues, I don't expect that the promotion will be approved. Since I've only been with Enron a short time and would like to continue good relations with PwC, I would appreciate whoever contacts Keith to elude that it is someone else other than myself who gave you his name. His number is 713 356 5617.

Dave Simpson - analyst at Koch Energy in Houston, has a degree in accounting and has work experience of about 9 months. He is very interested in leaving
