Subject: Entex Adjustments for 5/00

I have reviewed the Entex actuals and adjusted Gas Control's Entex factor for the month of May. I have found that Entex estimates have been overstated by approximately 10.0 Mmcf/Day.

Romeo:

Will you make sure the estimates that are in POPs are corrected to reflect the new volumes. This should help reduce some of the UA4 that Daren and Pat are trying to locate.

The attached file has the changes that need to be made. Please let everyone on this mailing list know once the changes have been made.

If you have any questions please call me at 36449.

Thanks
Gary H
