AFX News
(c) 2001 by AFP-Extel News Ltd

TOKYO (AFX-ASIA) - Tata has held exploratory talks to buy Enron's power plant in Dabhol, India, the Financial Times reported.
Tata Power has written to the Indian government expressing interest in the plant, though any deal would have to address the high tariff structure and interest rate burden on the project, the newspaper said.
It is understood that Enron is considering an offer price of about 80 cents to the dollar, it said.
Enron declined on Friday to confirm it was in talks with Tata, but said the best solution would be for the Indian government, or one of its Indian financial backers, to take on Dabhol.
Tata Power recently held talks with Indian financial institutions involved with the project. Officials from Dabhol Power Company, Enron's Indian arm, also attended.
About 70 pct of the Dabhol plant was funded by debt, with Indian financial institutions providing 1.4 bln usd and foreign lenders the balance.
Enron's Indian unit defaulted in September on interest payments to international lenders, blaming stopped payments by the Maharashtra State Electricity Board, the plant's sole client.

Qatar, Dolphin to sign final mega gas deal "shortly"

10/14/2001
Agence France-Presse

ABU DHABI, Oct 14 (AFP) - Qatar and Dolphin Energy will sign the final development and production sharing agreement (DPSA) for a multi-billion-dollar project to deliver Qatari gas abroad "shortly", the UAE Offsets Group (UOG) said Sunday.
"The development and production sharing agreement (DPSA) with Qatar Petroleum (QP) is due to be signed shortly," UOG said in a statement.
The state-run UOG added that Dolphin Energy will select by early next year an oil major to become a strategic partner in the project.
"Over the coming weeks, the international oil companies will be given additional data and invited to submit their offers by late December. One of them is scheduled to be selected in early 2002," UOG said.
UOG held separate negotiations last week with five shortlisted oil majors -- Conoco, ExxonMobil and Occidental Petroleum of the United States, BP

International and the Anglo-Dutch firm Shell -- to replace the US firm Enron Corp., which withdrew from the venture in May and transferred its 24.5 percent stake to UOG.
Enron's role was to build a 350-kilometre (220-mile) pipeline under the Gulf between Qatar and Abu Dhabi.
The Dolphin project aims to create a regional grid taking gas from Qatar to Abu Dhabi, Dubai, Oman and eventually Pakistan.
In a project estimated at an overall cost of up to 10 billion dollars, the gas is to be transported by undersea pipeline from Qatar to the Abu Dhabi coast.
The gas will be distributed inside Abu Dhabi and neighbouring Dubai through existing networks and will be transported between the two through a pipeline for which technical bids have already been submitted.
The pipeline will then continue overland to Oman and from there to Pakistan through an undersea pipeline. The extension to Pakistan is expected to cost up to an additional three billion dollars.

BUSINESS & TECHNOLOGY
NATURAL GAS BIG IN STATE'S FUTURE > NEW PIPELINES ARE PROPOSED TO FILL NEEDS
Antonio Fins Business Writer

10/14/2001

Prodded by rules requiring cleaner air and bolstered by a series of competing pipeline proposals, natural gas is set to become a major player in Florida's energy grid.
The state Public Service Commission projects that by the end of the decade, natural gas will account for 44 percent of the fuel used by Florida utilities, up from about 18 percent now. Utility companies use 85 percent of the natural gas burned in Florida.
As energy companies bid for the right to drill for oil and gas 100 miles off Florida's coast, other businesses are betting big dollars on natural gas.
Gulfstream Natural Gas System is already building a pipeline from Mississippi and Alabama across the Gulf of Mexico and into the Tampa area. Enron Corp. of Houston is proposing to spend as much as $400 million to build a pipeline from the Bahamas Port Everglades.
Enron's proposal is drawing rivals. El Paso Corp., also in Houston, wants to build a Bahamas to South Florida pipeline that comes ashore in West Palm Beach. And AES Corp. has purchased Ocean Cay, a speck of an island near Bimini

in the Bahamas for an energy complex that will include a power plant and a gas pipeline to Port Everglades.
The proposals are receiving scrutiny from county officials and environmental groups. Ultimately, federal regulators must give their approval before a pipeline can be constructed.
