FORECAST THE FUTURE,
PROJECT HIGHS & LOWS AND
DISCOVER HOW THE 1,2,3 METHOD REALLY WORKS!

Dear Andrew:

Introducing TIME, PRICE and PATTERN from trading war room veteran John Crane.

All-new 90-minute video and book offer shows you how to:

>> Pinpoint market entry and exit signals
>> Rely on internal market forces - not guesswork
>> Learn to overcome the 7 biggest mistakes traders make.

This incredible new method is nothing short of amazing. It combines price levels, market timing and confirmation patterns to strengthen the predictability of market moves - and your bottom line!

The STOCK INDEXES http://quotes.ino.com/exchanges/?c=indexes

Stock indexes closed lower on Wednesday. The NASDAQ gapped up on the open and traded to new highs for the year early in the session. However, a sell off ahead of the close due to profit taking led to a downside reversal on Wednesday. Additional weakness on Thursday is needed to confirm today's bearish reversal pattern thereby increasing the odds that a short-term top has been posted. Short-term momentum indicators are diverging and turning neutral to bearish hinting that a top is in or near. The NASDAQ closed down 10.85 points at 2044.89. The March S&P 500 index posted a key reversal down on Wednesday ending 8.80 points lower at 1154.50. March is poised to test the Dec./Jan. uptrend line crossing near 1148.70 on Thursday. Closes below this uptrend line and last week's low at 1136.50 would confirm that a double top has been posted.

The Dow closed lower on Wednesday as it tested broken fib resistance crossing at 10,094.10. Today's low-range close sets the stage for a test of the Dec./Jan. uptrend line crossing near 10,045 on Thursday. Closes below this support level would increase the odds that a short-term top has been posted.

INTEREST RATES http://quotes.ino.com/exchanges/?c=interest

March T-bonds closed higher on Wednesday due to a late- session short covering rebound. Today's high-range close leaves March poised to test the upper boundary of this winter's trading range crossing at 102-05. Closes above this resistance level would open the door for a larger-degree rebound into the later part of January with December's high crossing at 105-06 being a potential target. Short-term momentum indicators remain bullish signaling that sideways to higher prices are possible near-term.

The CRB INDEX http://quotes.ino.com/exchanges/?c=indexes

The CRB index closed modestly higher on Wednesday as it remains above 2001's downtrend line and the 25% retracement level of the 2000/01 decline crossing at 195. Confirmation of this week's trendline breakout would open the door for a possible test of last September's high, which coincides with the 38% retracement level of the 2000/01 decline crossing at 202.52 later this winter. Strength in soybeans, cattle and precious metals underpinned today's rally. The daily ADX (a trend-following indicator) signals that additional strength is possible.

ENERGY MARKETS http://quotes.ino.com/exchanges/?c=energy

The energy markets closed lower on Wednesday in responds to Tuesday's bearish API inventory reports. The latest API report showed that crude oil stocks for last week rose by 115,000 barrels. Gasoline stocks rose by 798,000 barrels and distillate stocks including heating oil rose by 5.682 million barrels. The increases in inventory indicate that demand remains weak in the face of weak U.S. and world economic conditions.

February crude oil closed sharply lower on Wednesday and below December's uptrend line crossing near 20.40 thereby confirming that Monday's high marked a short-term top. Closes below last week's low crossing at 19.66 would open the door for a larger-degree decline into the later part of January. Stochastics and the RSI have turned bearish from overbought levels signaling that sideways to lower

prices are likely over the next few weeks.

February heating oil plunged to new lows for the year on Wednesday and closes below last week's low of 55.20 thereby opening the door for a possible test of December's low crossing at 50.70 later this month. Stochastics and the RSI are bearish signaling additional
