Subject: Direct Access - Potential Cost Savings

This memo lays out some numbers with regard to the question raised earlier this week concerning the savings to CDWR if direct access were to be reinstated.

Using available annual mWh sales figures for PG&E and SCE (1999), commercial and industrial sales as a percentage of total sales is 63% for PGE and 68% for SCE, or, in terms of annual mWh purchases, approximately 63,900,000 kWh for PGE and 61,200,000 kWh for SCE for a total C&I purchase requirement of 125,100,000 kWh.

Assuming that every kWh of C&I load that switches to direct access is an equivalent reduction in CDWR purchase requirements (which assumes that CDWR fills 100% of the net short) and bracketing CDWR per unit purchase costs between its published portfolio cost and an assumed market price of $250 per kWh, the following cost reductions (stated on a monthly basis) are shown below:

Per Month Purchase Cost Reduction

Switch to Direct Access	CDWR Portfolio Cost - $79/mWh	Market Price - $250/mWh
5%	$41mm	$130 mm
10%	$ 82 mm	$260 mm
