Western Spot Power Prices Stable to Higher on Southwest Heat

Phoenix, May 15 (Bloomberg Energy) -- Western U.S. peak spot power prices for delivery tomorrow increased on weather-related demand in the Southwest.

Traders also said that higher natural gas values were keeping

a floor beneath Southwest power prices. Natural gas for June delivery on the New York Mercantile Exchange rose as high as $4.635 per British thermal, 24.1 cents higher from yesterday's close.

At the SP-15 delivery point in Southern California, peak power gained $8 to a Bloomberg index of $213 a megawatt-hour, amid trades in the $205-$220 range.

Traders said that Arizona's Public Service Co. 1,270-megawatt Palo Verde-1 nuclear plant in Wintersburg, Arizona, increased production to 50 percent of capacity following the completion of a scheduled refueling outage that began March 31.

At the Palo Verde switchyard in Arizona, peak power rose $2.64, to a Bloomberg index of $223.13 as traders executed transactions in the $212.50-$250.00 range.

According to Weather Services Corp., of Lexington Massachusetts, temperatures in Phoenix were expected to reach 101 [REDACTED] B6 degrees.

At the California Oregon Border, peak power increased $44.34 from yesterday. Traders completed trades in the $240.00-$250.00 range.

"Power prices are rising as energy traders are being bullish in today's market,'' said one Northwest trader.

At the Mid-Columbia trading point in Washington, peak power rose $31.03 to a Bloomberg index of $236.43, with trades at $235.00-$250.00.
